

Bliss Lab Wholesale Line Sheet

Bliss Lab: High-Quality Hemp, Rooted in Insight.

Bliss Lab is on a mission to foster a more intentional relationship with the cannabis plant through knowledge and exceptional quality.

Founded by Keiko Sono, the company was born from direct experience on the sales floors of a leading CBD retailer and a wellness cannabis dispensary. There, she identified a clear, consistent demand from customers for premium CBD-dominant flower.

We answer that demand. Bliss Lab supplies retailers nationwide with rigorously curated CBD and CBG hemp flower and kief, offering the quality and specificity that discerning customers seek.

\$4.50 / 1 x .5g joint

Note: Hemp pre rolls are not legal in NY, RI, VT, CA, and LA, but we have a special offer. See Wholesale Terms

CBD FAQ Sheet

Science

Q: How does CBD change the THC Experience?

A: THC is powerfully psychoactive because it binds strongly to our CB1 receptors. Modern high-potency cannabis can overwhelm these receptors, sometimes leading to anxiety, paranoia, or rapid heartbeat. This can also accelerate tolerance, requiring more to feel the same effect.

CBD interacts with the same receptor at a different site, subtly changing its shape. This modulates THC's binding, helping to reduce the risk of negative side effects while preserving its positive benefits.

Misconception

Q: Does CBD cancel out THC?

A: No. A common misconception is that CBD weakens THC. The reality is more profound: CBD can enhance the very effects you seek from THC, like relaxation and euphoria.

On its own, CBD's effect is subtle. But when combined with THC, its presence becomes pronounced. Many describe it as a warm, calming blanket or like gliding smoothly instead of on an unpredictable flight.

Users also report that adding CBD can prevent headaches and make social experiences more comfortable.

Our Promise

Q: Why Bliss Lab CBD?

A: We are dedicated to products that deliver the full-spectrum benefits of the cannabis plant and to bridging the arbitrary gap between "hemp" and "cannabis." They are, after all, the same plant.

Our CBD flower and kief are crafted with exceptional care by one of the nation's leading hemp farms. They are grown without harmful pesticides, using biodynamic and organic practices that meet or exceed USDA organic standards.

Each of our products comes with a link to COA. They are 100% Farm Bill compliant.

Ideal for...

Q: Who is Bliss Lab CBD for?

A: Bliss Lab CBD is great for people who:

- Want to dial up THC's effects without increasing anxiety.
- Seek a functional, clear-headed experience for daytime use.
- Desire deeper relaxation.
- Enjoy THC but are cautious about anxiety or paranoia.
- Have built a high tolerance to THC and wants to reset their sensitivity.

Wholesale Terms
